

General Description

CRYLCOAT®E 04884 is a carboxylated polyester resin for use with HAA hardeners in the production of low gloss single extrusion powder coatings with a 60° gloss range of approx. 20 to 30%. The resin is superdurable by design, correspondent matte coatings should be checked for outdoor durability. Coatings based on CRYLCOAT®E 04884 exhibit very good mechanical properties, flow and smoothness.
